Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 11 June 2004.
- 2a) ☒ This action is FINAL. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 U.S.C. § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lavy (U.S.6,059,426) in view of Leen (U.S.5,984,490).

Lavy ('426) discloses a lamp head incorporated with anti-combustion arrangement having:

Regarding claim 1 as shown in (figs. 1,2,3B), a housing or head (10), a bulb unit (52) generally uniformly spaced within the housing (10), a shield (53) connected to the housing, for inhibiting access to the light halogen bulb unit (52) from above. The shield (53) is positioned such that the halogen light bulb unit (52) is between the shield (53) and the housing.

Regarding claim 2, there is a vent area (611) for heated air from the lamp (52).

Regarding claim 3, there is a heat sensor (90) placed within the housing, for shutting off the light bulb units at a threshold temperature.

Lavy ('426) does not disclose using a plurality of halogen light bulb units.

Leen ('490) discloses a portable double-bulb halogen work light/floodlight having:

Art Unit: 2875

Regarding claim 1 as shown in (fig. 1), a plurality of halogen light bulb units (21, 23) generally uniformly spaced within the housing, a switch (63/65) for commonly switching the plurality of halogen light bulb units (21,23), wherein the plurality of halogen bulbs (21,23) are configured such that the temperature of the shield on the surface opposite the plurality of halogen bulbs stay below a temperature that would ignite a flammable material.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize the lamp head incorporated with anti-combustion arrangement of Lavy ('426) with the plurality of halogen light bulb units as taught by Leen ('490), in order to increase the light output, this includes an open-sided housing in which at least two halogen bulbs are located. The use of two bulbs allows the illumination device to be used as a low-light output or a high-light output.
